

## TABLE OF CONTENTS

Executive Summary.....	ES-1
Introduction .....	ES-1
Policies .....	ES-2
Planning Considerations .....	ES-2
System Analysis.....	ES-2
Plan Findings .....	ES-3
Plan Recommendations .....	ES-4
Capital Investment Program .....	ES-4
Storm and Surface Water Emerging Issues.....	ES-4
Strategic Initiatives.....	ES-5
Chapter 1 INTRODUCTION .....	1-1
Plan Purpose .....	1-1
Guidelines for Current Plan Update.....	1-1
How this Plan was Completed .....	1-2
Public Input .....	1-2
Stormwater Management Guide.....	1-3
Bellevue Storm and Surface Water System, General Information .....	1-3
Bellevue Storm and Surface Water History .....	1-5
Chapter 2 STORMWATER MANAGEMENT CHALLENGES AND OPPORTUNITIES .....	2-1
Nature of Stormwater.....	2-1
History of Stormwater Management.....	2-1
Current Challenges.....	2-3
Future Challenges and Opportunities.....	2-4
Chapter 3 COMMUNITY VISION AND REGULATORY FRAMEWORK.....	3-1
Goals for Stormwater Management (Vision/Mission).....	3-1
Regulatory Drivers .....	3-2
Clean Water Act.....	3-2
Endangered Species Act.....	3-6
National Flood Insurance Program .....	3-6
Growth Management Act .....	3-6
Bellevue Storm and Surface Water Utility Code.....	3-7
Regional and Local Plans.....	3-7

Summary .....3-7

Chapter 4 POLICIES .....4-1

    Storm and Surface Water General Policies .....4-3

        Customer Service Policies .....4-3

        Water Quality Policies.....4-3

        Regional Policies .....4-4

        Financial Policies .....4-4

        Deleted Policies.....4-4

    Storm and Surface Water Policies .....4-5

        Customer Service Policies .....4-5

        Water Quality Policies.....4-9

        Regional Policy .....4-15

    Waterworks Utility Financial Policies.....4-17

        Introduction .....4-17

        General Policies.....4-17

        Capital Investment Program Policies .....4-21

        System Expansion and Connection Policies .....4-26

        Rate Policies .....4-29

        Operating Reserve Policies .....4-34

Chapter 5 STORM AND SURFACE WATER MANAGEMENT ROLES, RESPONSIBILITIES, AND COMMUNICATIONS .....5-1

    City of Bellevue Roles and Responsibilities.....5-1

        Regulations and Enforcement.....5-1

        Planning.....5-1

        Operations and Maintenance .....5-2

        Capital Projects .....5-2

        Education .....5-3

        Emergency Response .....5-3

        Water Quality/NPDES Municipal Stormwater Permit .....5-3

        Chinook Salmon Recovery (ESA) Regional and City-wide Coordination .....5-4

        Monitoring and Modeling .....5-4

    Communication and Coordination.....5-4

    Interaction with Non-stormwater Programs .....5-5

Water .....5-5

Wastewater.....5-6

Street Maintenance .....5-6

Opportunities for Additional Coordination.....5-7

Groundwater.....5-7

Stream Planning and Projects .....5-7

Stormwater and Streams Maintenance.....5-7

Capital Projects in Parks.....5-7

Aquatic Education .....5-8

Environmental Permitting.....5-8

Summary of Key Roles and Communication Needs.....5-8

Chapter 6 CURRENT CONDITIONS - STATE OF THE STORM AND SURFACE WATER SYSTEM .....6-1

Existing Conditions of the Storm and Surface Water System .....6-1

Background .....6-1

Rainfall .....6-3

Soils and Geology.....6-4

Land Cover .....6-4

Vegetative Cover.....6-5

Built Environment .....6-5

Water Quality.....6-6

Goals and Evaluation Criteria.....6-14

Basin Evaluation Criteria .....6-15

Evaluating Flow Control and Flood Protection .....6-16

Flooded Structures during Storm Events .....6-17

Number of Flood Damage Claims .....6-17

Number of Road Closures .....6-17

Background Information on Flooding .....6-21

Evaluating Water Quality Protection .....6-29

Water Quality Evaluation.....6-31

Evaluating Stream Habitat .....6-35

Wood Pieces per Channel Width .....6-35

Pool Quality.....6-37

Benthic Macroinvertebrates and Biotic Integrity .....6-37

Supplemental Stream Condition Information.....6-41

    Stream Flow .....6-41

    Stream Channel Condition .....6-44

    Riparian Condition .....6-45

    Lake Physical Characteristics.....6-45

    Sedimentation.....6-48

    Observed Stream Issues.....6-49

    Fish Access, Passage Barriers, and Spawning Habitat.....6-51

    Presence of Aquatic Species .....6-55

    Wetlands .....6-61

Summary – State of the System.....6-62

Data Gaps and Recommendations.....6-64

    Physical System .....6-64

    Water Quality.....6-64

    Biological .....6-65

Chapter 7 SUMMARY OF BASIN ISSUES AND NEEDS .....7-1

    Potential Actions to Address Basin Issues .....7-1

    Introduction .....7-1

    Summary of Basin Conditions .....7-2

        Flooding.....7-2

        Water Quality.....7-2

        Stream Habitat.....7-3

    Basin Types.....7-3

        Basins with Salmon-spawning Streams.....7-5

        Basins with Small Streams and/or Steep Relief .....7-6

        Basins with Predominantly Closed Conveyance Systems .....7-9

Chapter 8 ASSET MANAGEMENT .....8-1

    Asset Management Program Structure .....8-1

        Develop Asset Inventory .....8-1

        Assess Condition .....8-4

        Determine Residual Life .....8-4

        Determine Life Cycle Costs .....8-5

        Set Target Level of Service .....8-5

Determine Business Risk Exposure .....	8-5
Optimize Operations and Maintenance.....	8-5
Optimize Capital Improvement Program.....	8-6
Determine Funding Strategy .....	8-6
Build the Asset Management Program.....	8-6
Asset Management Program Relationship to the NPDES Program .....	8-7
Recommendations .....	8-7
Chapter 9 UTILITIES OPERATIONS.....	9-1
Organizational Structure.....	9-1
System Protection and Maintenance.....	9-2
System Components .....	9-2
Preventative Maintenance.....	9-3
Infrastructure Condition Assessment .....	9-4
System Repair and Installation .....	9-4
Private Drainage Inspection .....	9-4
Stormwater Pollution Prevention Plans at Public Facilities .....	9-5
Regional Endangered Species Act Roads Maintenance .....	9-5
Supporting Programs and Tools.....	9-5
Physical System Monitoring.....	9-6
Telemetry Systems.....	9-6
Water Quality and Illicit Discharge Detection and Elimination .....	9-6
Aquatic Habitat and Biological Information.....	9-7
Communications Tools.....	9-7
Floodplain Management Program (FEMA’s National Flood Insurance Program).....	9-8
Capital Investment Program .....	9-11
Preparedness and Response.....	9-12
Environmental Response .....	9-12
Water Quality Response .....	9-12
Emergencies.....	9-12
Chapter 10 PUBLIC EDUCATION AND OUTREACH .....	10-1
Introduction .....	10-1
Goals and Objectives.....	10-2
Current Programs.....	10-2

Recommendations ..... 10-4

Chapter 11 FINANCIAL INFORMATION ..... 11-1

    Current Financial Status ..... 11-1

    Current Debt Status ..... 11-2

    Credit Worthiness ..... 11-2

    Financial Outlook ..... 11-4

    Funding Plan for the Capital Investment Program ..... 11-4

    Funding for the Infrastructure Renewal and Replacement Program ..... 11-7

Chapter 12 ADAPTIVE MANAGEMENT ..... 12-1

    Bellevue Utilities Department Monitoring and Adaptive Management Programs ..... 12-2

        APWA Accreditation Process ..... 12-2

    Bellevue Monitoring Programs ..... 12-4

        Telemetry and Hydrologic Systems ..... 12-4

        Operations and Maintenance ..... 12-5

        Monitoring Data from Outside Entities ..... 12-7

    Future Direction ..... 12-8

        Regional and State Initiatives ..... 12-8

        Other Drivers for Monitoring and Information ..... 12-9

    Summary ..... 12-9

Chapter 13 EMERGING ISSUES AND PLAN RECOMMENDATIONS ..... 13-1

    Plan Recommendations ..... 13-1

    Capital Investment Program ..... 13-1

        Flood Control ..... 13-1

        Water Quality ..... 13-2

        Fish and Wildlife Habitat ..... 13-2

        Asset Management ..... 13-3

    Storm and Surface Water Emerging Issues ..... 13-4

        Management of Stormwater ..... 13-4

        Puget Sound Partnership ..... 13-5

        Recommendation for Support of Regional Planning Efforts ..... 13-5

        Continue to support regional planning efforts and activities related to water quality, quantity, and habitat consistent with community values and resources. .... 13-5

        Regulatory Drivers ..... 13-6

Water Quality Improvement Project Process ..... 13-6

Regional Water Quality Monitoring ..... 13-6

Chapter 14 STRATEGIC INITIATIVES ..... 14-1

Background ..... 14-1

Strategic Initiatives..... 14-3

1) Primary Stormwater Infrastructure ..... 14-3

    Problem Statement:..... 14-3

    Objective: ..... 14-4

    Background: ..... 14-4

    Big Vision Outcome:..... 14-5

    Strategies: ..... 14-5

2) Property Management Plans ..... 14-6

    Problem Statement:..... 14-6

    Objective: ..... 14-6

    Background: ..... 14-7

    Big Vision Outcome:..... 14-7

    Strategies: ..... 14-7

3) Improving Water Quality ..... 14-8

    Problem Statement:..... 14-8

    Objective: ..... 14-8

    Background: ..... 14-8

    Big Vision Outcome:..... 14-9

    Strategies: ..... 14-9

4) Open Streams Condition Assessment..... 14-10

    Problem Statement:..... 14-10

    Objective: ..... 14-10

    Background: ..... 14-10

    Big Vision Outcome:..... 14-12

    Strategies: ..... 14-12

    Known/Existing Actions: ..... 14-13

5) Citywide Watershed Management Plan Assessment ..... 14-14

    Problem Statement:..... 14-14

    Objective: ..... 14-14

Background .....14-15  
Big Vision Outcome:.....14-16  
Strategies: .....14-16  
Chapter 15 REFERENCES .....15-1

**List of Appendices**

- A Overview of Current Utilities Activities in Aquatic Habitat
- B Supporting Information Used in the State of the System Evaluation
- C Supporting Information Addressing Basin Issues and Needs
- D Storm and Surface Water Management Guide

## List of Figures

Figure 1-1. City of Bellevue Storm Drainage Basins.....	1-4
Figure 2-1. Timeline of stormwater-related drivers and events.....	2-2
Figure 2-2. Percent of city developed vs. type of stormwater requirements. ....	2-3
Figure 4-1. Policy flow chart. ....	4-2
Figure 4-2. Watermain replacement spending.....	4-19
Figure 4-3. Sewermain replacement spending.....	4-20
Figure 4-4. Ordinance 4783 Capital Facilities Renewal and Replacement. ....	4-22
Figure 4-5. Resolution No. 5759. Waterworks Utility Debt Service Policy.....	4-25
Figure 6-1. City of Bellevue streams and drainage basins.....	6-2
Figure 6-2. Annual rainfall, Bellevue, WA, 1981-2014.....	6-3
Figure 6-3. Average monthly rainfall, Bellevue, WA, 1981-2014. ....	6-3
Figure 6-4. Contrasting rainfall distributions between urban land cover and undeveloped land cover.....	6-5
Figure 6-5. Phantom Lake water quality monitoring results (bars) and goals (dashed lines) from 1994 through 2014 for total phosphorus (TP), chlorophyll-a (Chlor a), and Secchi visibility.....	6-8
Figure 6-6. Kelsey Creek stream temperatures (°C) (7-day average maximum) averaged over approximately 2-week time periods during the start of the salmon spawning in 2001. ....	6-10
Figure 6-7. Total impervious area and percentage within the 100-foot stream buffer and total tree canopy cover and within basin stream buffers within Bellevue city limits. ....	6-13
Figure 6-8. Total impervious area percentage of each drainage basin and within the 100-foot stream buffer (upper graph), and tree canopy cover of each drainage basin and within basin stream buffers (lower graph) within Bellevue city limits. ....	6-14
Figure 6-9. NE 21st Street floods on December 12, 2010. ....	6-16
Figure 6-10. Structural flooding map.....	6-18
Figure 6-11. Paid flood claims basin map. ....	6-19
Figure 6-12. Street closure map due to flooding. ....	6-20
Figure 6-13. Regional detention facilities. ....	6-22
Figure 6-14. Effect of regional detention in Kelsey Creek. ....	6-23
Figure 6-15. General time of development or redevelopment for parcels in Bellevue outside the right-of-way, and corresponding stormwater development standards for that time period...	6-24
Figure 6-16. Annexation history illustrates that much of the city was already developed prior to implementing stormwater regulations.....	6-27
Figure 6-17. Example of sites surveyed routinely during storm events to prevent flooding. If needed, debris is cleared from grates, or other maintenance is performed. Note: This maps is dynamic and constantly being revised. ....	6-28
Figure 6-18. 2008 Water Quality Assessment map showing ratings for water bodies in Bellevue and the vicinity based on state and federal water quality criteria for beneficial uses. ....	6-32
Figure 6-19. Water quality risk assessment that identifies potential risk areas for pollution entering streams, based on land use, outfalls to streams, and fish use. ....	6-34

Figure 6-20. Stream habitat conditions map. .... 6-36

Figure 6-21. Benthic macroinvertebrate sites sampled in Bellevue between 1998 and 2014, and the most recent B-IBI site score and corresponding rating for each site. .... 6-39

Figure 6-22. Highest and lowest B-IBI scores for all sites sampled in and near Bellevue from 1998 through 2014. Note: The scores represent the variability within the sites, not trends over time. Sites with the same high and low score were only sampled once. .... 6-40

Figure 6-23. B-IBI scores for sites in Bellevue and the greater Puget Sound region, showing that Bellevue sites are consistent with sites in nearby urbanized areas. .... 6-40

Figure 6-24. Hypothetical runoff hydrographs illustrating effect of land use. .... 6-42

Figure 6-25. Peak annual flow at the Mercer Gauge on Kelsey Creek compared to human population in Bellevue each year from 1953 through 2014. .... 6-42

Figure 6-26. TQ mean (proportion of time stream flow was above the mean daily flow during the water year) for Kelsey Creek from 1956 to 2014. .... 6-44

Figure 6-27. Lake Washington average water levels over a year based on daily measurements (collected at 8:00 am) at the Ship Canal, measured between 1979 and 1999. .... 6-46

Figure 6-28. Water level elevation of Lake Sammamish, as measured from USGS gauge 12122000, for water years 2000 through 2014. .... 6-47

Figure 6-29. Mean annual Phantom Lake water level elevations as measured by City of Bellevue, from 1995 through 2014, and total annual rainfall in north Bellevue. .... 6-48

Figure 6-30. Percent fine sediments (<0.85 mm) in stream gravels at three sites were higher than recommended for salmon habitat. .... 6-49

Figure 6-31. Stream issues identified by field crews during Citywide Stream Assessment surveys between 1998 and 2001. .... 6-50

Figure 6-32. Drainage-related issues from surface water work requests between 1989 and 1999 during a Citywide Stream Assessment. .... 6-50

Figure 6-33. Fish Passage barriers in Bellevue streams. Note: Partial barriers may be passable by some fish during low or high flows. Culverts are owned by Bellevue Utilities Department and others. .... 6-52

Figure 6-34. Length of stream in each basin, with the amount suitable for salmon spawning on City-owned property and private property. .... 6-54

Figure 6-35. Proportion of the 5.7 miles of City-owned suitable spawning habitat in Bellevue’s drainage basins. .... 6-54

Figure 6-36. Salmon escapement (estimated number of adults returning to spawn based on number of redds or egg nests) for Kelsey & Coal Creek from 2000 to 2014. .... 6-56

Figure 6-37. Adult salmon and trout distribution in Bellevue streams, 1996 - 2015. .... 6-58

Figure 6-38. Streams, lakes, wetlands, and currently active gauge stations in Bellevue. .... 6-63

Figure 7-1. Drainage basin types; salmon spawning, small and/or steep streams, and predominantly piped conveyance systems. .... 7-4

Figure 8-1. USEPA Asset Management Program framework processes. .... 8-1

Figure 8-2. Bellevue's municipal storm and surface water conveyance system, including streams and most of the piped public drainage system. .... 8-3

Figure 9-1. Bellevue Utilities Department organizational chart showing division and section responsibilities and functions (updated 5-11-15)..... 9-2

Figure 9-2. Status of floodplain mapping in each of Bellevue’s drainage basins as of 2015.... 9-10

Figure 11-1. Storm and Surface Water Utility R&R Funding..... 11-8

Figure 12-1. Adaptive Management Concept..... 12-2

**List of Tables**

Table ES- 1. Storm system planning criteria and evaluation metrics. .... ES-3

Table 3-1. Regulatory framework of surface water management in the city of Bellevue. .... 3-4

Table 4-1. Summary of storm and surface water policies by categories..... 4-3

Table 4-2. Summary of Recommended Consolidated Reserve Levels..... 4-36

Table 6-1. Hydrologic soil grouping for Bellevue. .... 6-4

Table 6-2. Land cover area..... 6-6

Table 6-3. Planning criteria and evaluation metrics or indicators used to evaluate basins in terms of storm and surface water goals..... 6-16

Table 6-4. Age of built developments in Bellevue. .... 6-25

Table 6-5. Common pollutants and their impacts on aquatic systems. .... 6-30

Table 6-6. Stream habitat quality ratings based on habitat suitability for salmon from the Salmon and Steelhead Habitat Limiting Factors Report (Kerwin 2001). .... 6-45

Table 6-7. Definitions of stream issues identified during the 1998 to 2001 Citywide Stream Assessment. .... 6-51

Table 6-8. Suitable stream spawning habitat for Chinook, coho, and sockeye salmon in each drainage basin, based on a GIS analysis. .... 6-55

Table 6-9. Fish observed during summer electrofishing surveys at several sites in the Kelsey Creek basin and its tributaries, 1983, 1996, 2002, 2007, and 2010 through 2014..... 6-61

Table 7-1. Summary of major plans and studies, and status of recommendations..... 7-6

Table 8-1. Public Drainage Asset Summary ..... 8-2

Table 10-1. Current Utilities Department programs to achieve the City’s stormwater goals.. 10-3

Table 11-1. Current financial status of the Storm and Surface Water Utility, 2011 through 2014. .... 11-1

Table 11-2. Number of customer accounts receiving storm and service water services..... 11-2

Table 11-3. Combined financial information for 2007 through 2014 for the Waterworks Utility, which includes Water, Wastewater, and Storm and Surface Water..... 11-3

Table 11-4. Financial forecast information for the Storm and Surface Water Utility. .... 11-5

Table 11-5. Capital Investment Program (CIP) funding status for storm and surface water projects, 2015 through 2021. .... 11-6

Table 11-6. Current and projected renewal and replacement (R&R) fund balances for replacement of aging infrastructure..... 11-7

Table 14-1. Initiatives, policies, and Mission Statement goals related to the Primary Stormwater Infrastructure initiative..... 14-3

Table 14-2. Initiatives, policies, and Mission Statement goals related to the Property Management Plan initiative..... 14-6

Table 14-3. Initiatives, policies, and Mission Statement goals related to the Improving Water Quality initiative..... 14-8

Table 14-4. Initiatives, policies, and Mission Statement goals related to the Open Streams Condition strategic initiative..... 14-10

Table 14-5. Initiatives, policies, and Mission Statement goals related to the Citywide Watershed Management Plan strategic initiative..... 14-14
